Dear Mr Nicholas Hood,

Thank you for your applying for fellowship of the Institute of Physics. Your application has been peer reviewed by a panel of assessors who have acknowledged and confirmed your achievements.

I am honoured to inform you that your application has been successful and we are now able to award you fellowship of the IOP. I would like to take this opportunity to congratulate you and to welcome you to the fellowship community.

Your membership number remains unchanged and you can still take advantage of your current membership benefits, as well as new opportunities outlined below. What's more, you are entitled to use the designatory letters FInstP after your name.

Fellowship provides an opportunity to connect with likeminded people, attend engaging events, give back through mentoring and outreach initiatives, and enhance your professional development. These opportunities are reflected through our values, which outline the benefits and aspirations of the community:

Recognition – confirm your position as a leading physics professional and receive recognition among your peers for excelling in your sector

Opportunity– enjoy opportunities to connect and share ideas with other fellows. Build new partnerships and enhance your professional development through innovation and collaboration

Inspiration – be a role model for the next generation. As an IOP ambassador, use your experience and enthusiasm to encourage others to study, work and excel in physics

Leadership – progress the future of physics by helping to strengthen the voice of the Institute. Become an advocate and speak on behalf of the community as its representative

Having been awarded fellowship, you have the opportunity to take on a leading role in the IOP. We ask you to continue to act as an ambassador, supporting the IOP to promote the value of physics to society and to inspire others to study, work and excel in physics. Please take every opportunity to share your passion for physics and to celebrate your achievements with the wider community.

Once again, congratulations on your success. With your support, I am confident that we can progress the future of physics.

Yours sincerely,

Sheila Rowan CBE
President, Institute of Physics
